Dear All,

Thank you for your continued hard work.

Please be informed that we have **implemented the Prisma Remote Network** on our firewall, which provides a **direct and secure network connection with HQ.**

This new setup offers the following benefits:

- Secure and reliable connectivity
- Faster network performance
- **No need to connect to the GlobalProtect application** while on the office network

Accordingly, **when you are connected to the Matarbari office network, laptops and desktops should not connect to GlobalProtect.**

Please note:

- This facility is applicable **only for POC-Management and PTJV-Staff Wi-Fi.**
- **POC-provided iPhones and iPads must connect to the Guest Wi-Fi.**
Connecting to any other network may result in messages such as **"Privacy & Security Alert"** or **HTTPS certificate errors.**
- **TOA Management Wi-Fi remains unchanged.**

We are currently monitoring the **status and performance** of this new setup.

If you experience any issues, we would appreciate it if you could inform the IT team.

Thank you for your cooperation.

Best regards,

-

M. Ashik E Sadatia
